3-Mrs. Cypher is making a square picture frame for herself and one for each of her three friends. She is using popsicle sticks that measure 4 inches long to make each side of the square frame. She wants to glue ribbon to the sides as a border for the frame. How much ribbon will she need for all four frames? *Hint: picture frame=perimeter*

4-Mr. Hill runs a catering company. He has an event today and must set up three tables covered with black tablecloths for the guests. The only rectangular tablecloths that are clean will cover a table measuring 42 square feet, because they are 6 feet wide and 7 feet long. Using a diagram of the available tables, are there at least three tables that can be used for the event that can be covered by the tablecloths? Show your work and justify your solution. *Hint: Tablecloths that cover a table=area*
